

Scientific & Medical Disclaimer

Purpose of This Disclaimer

This Scientific & Medical Disclaimer applies to all content published on www.stem4cells.com ("Website") by **STEM4CELLS Sp. z o.o.** ("STEM4CELLS", "Company", "we", "our", or "us").

The Website contains scientific, technical, educational, and corporate information relating to biotechnology, regenerative medicine, stem cell technologies, cell-based therapies, immunology, tissue engineering, and related fields.

The information is provided solely for educational and informational purposes and should not be interpreted as professional medical, veterinary, or scientific advice.

No Medical Advice

Nothing contained on this Website constitutes or should be interpreted as:

- medical advice;
- veterinary advice;
- clinical recommendations;
- diagnosis;
- treatment guidance;
- healthcare services;
- pharmaceutical advice.

The information presented is not intended to replace consultation with qualified physicians, veterinarians, healthcare professionals, or other licensed practitioners. Users should always seek independent professional advice before making healthcare or treatment decisions.

No Doctor–Patient or Veterinarian–Client Relationship

Accessing this Website, submitting an inquiry, downloading materials, or communicating with STEM4CELLS does not establish:

- a physician–patient relationship;
- a veterinarian–client relationship;
- a healthcare provider relationship;
- a clinical consultation;
- any fiduciary or professional relationship.

No professional services are provided through this Website.

Scientific Information

The Website may include:

- scientific publications;
- research summaries;
- laboratory methodologies;
- technology descriptions;
- conference presentations;
- educational resources;
- white papers;
- technical documentation.

Scientific information reflects the current state of knowledge at the time of publication. Because biomedical science evolves continuously, scientific understanding, methodologies, and accepted practices may change over time. STEM4CELLS makes reasonable efforts to keep information accurate but does not warrant that all scientific content remains current or complete.

Research Status

Many technologies, products, methods, or scientific concepts described on this Website may still be:

- under development;
- undergoing laboratory validation;
- evaluated in preclinical studies;
- investigated in research collaborations;
- subject to future regulatory review.

Descriptions of research activities should not be interpreted as evidence of proven clinical effectiveness or commercial availability.

Research outcomes may differ from expected results and remain subject to independent scientific verification.

Experimental Technologies

Certain technologies described on this Website may be experimental or investigational.

References to:

- stem cell technologies;
- extracellular vesicles;
- regenerative medicine;
- immunomodulation;
- tissue engineering;
- advanced biotechnology platforms;

do not imply that such technologies are approved, routinely available, or suitable for every patient, animal, or clinical indication.

Any future clinical application depends upon applicable scientific evidence and regulatory authorization.

No Guarantee of Clinical Outcomes

Scientific publications, laboratory findings, case reports, technical discussions, or examples presented on this Website should not be interpreted as guarantees of therapeutic success.

Individual biological responses vary significantly.

Clinical outcomes depend on numerous factors, including but not limited to:

- diagnosis;
- disease stage;
- patient or animal characteristics;
- treatment protocol;
- clinician expertise;
- regulatory approvals;

- scientific evidence available at the time of treatment.

STEM4CELLS makes no guarantee regarding any specific medical or veterinary outcome.

Regulatory Status

Unless expressly stated otherwise, no statement on this Website should be interpreted as indicating that any product, technology, or procedure has been approved, authorized, certified, or licensed by any regulatory authority.

This includes, but is not limited to:

- European Medicines Agency (EMA);
- U.S. Food and Drug Administration (FDA);
- European Commission;
- national competent authorities;
- veterinary regulatory agencies;
- other international regulatory organizations.

Any references to ongoing regulatory activities are provided solely for informational purposes.

Educational Content

The Website is intended to promote scientific awareness and facilitate communication regarding biotechnology and regenerative medicine.

Educational materials are not intended to:

- advertise unapproved medical treatments;
- promote off-label use;
- encourage self-diagnosis;
- recommend self-treatment;
- replace professional medical evaluation.

Users should consult qualified professionals before making healthcare decisions.

Scientific Publications and References

The Website may refer to published scientific literature, conference abstracts, research collaborations, or academic institutions.

Such references are included to support scientific discussion and should not be interpreted as endorsements of STEM4CELLS or its products.

The interpretation of scientific literature should always consider the context, methodology, limitations, and date of publication.

Forward-Looking Statements

This Website may contain statements regarding anticipated scientific developments, future research directions, technological innovation, collaborations, or business strategies.

Such forward-looking statements involve uncertainties and should not be interpreted as guarantees of future performance, regulatory approval, commercial success, or scientific outcomes.

Actual results may differ materially from current expectations.

Third-Party Content

Scientific articles, publications, external databases, or third-party resources referenced on this Website remain the responsibility of their respective authors or publishers.

STEM4CELLS does not assume responsibility for:

- external scientific opinions;
 - independent research findings;
 - third-party publications;
 - linked websites;
 - external educational materials.
-

Limitation of Liability

To the fullest extent permitted by applicable law, STEM4CELLS shall not be liable for any loss, injury, damage, or adverse consequence resulting from:

- reliance on scientific information published on this Website;
- interpretation of research findings;
- use of educational materials;
- misunderstanding of technical information;
- decisions based on Website content.

Users assume full responsibility for how they interpret and use the information provided.

Changes to Scientific Information

Biomedical science evolves rapidly.

STEM4CELLS reserves the right to update, revise, modify, or remove scientific information without prior notice to reflect advances in research, regulatory developments, or technological progress.
